ITC Global Introduces Crew Welfare Solution

ITC Global Introduces Crew Welfare Solution Based on Top In-Flight Entertainment Technology

OilComm, Houston, TX – November 3, 2015 – [ITC Global](#), a leading provider in satellite communications to remote and harsh environments, today announced that they will be unveiling ITC Crew LIVE , their new comprehensive crew welfare solution leveraging the leading in-flight service entertainment technology, at OilComm 2015. ITC Crew LIVE, which stands for LiveTV, Internet, Video and E -learning, will provide a new level of connectivity to offshore crews through reliable wireless access for voice, Internet and content streaming.

Whereas other crew welfare systems reside on the corporate network, ITC Crew LIVE offers owners and operators a turnkey solution for crew welfare that stands apart from the operational platform and is supported by its own dedicated satellite equipment and bandwidth. This ensures that business and personal use are kept entirely separate to provide the best user experience and offers added security, as well a redundant backup to the corporate network. The dedicated service offers download speeds up to 10 Mbps and upload speeds between 1 Mbps and 2 Mbps globally.

Offshore crews are significantly underserved with communications resources for off-hours or recreational Internet use. They are limited to small Wi-Fi access points operating on the corporate network or direct to home systems deployed on near shore assets in certain regions. Additionally, platform owners and operators are sensitive to an increasing millennial-aged workforce that has grown to expect ubiquitous connectivity. ITC Global demonstrations and information will be available for the media at OilComm 2015.

About ITC Global

ITC Global is a leading provider of satellite communications to the energy, mining, and maritime markets. Companies in remote and harsh environments require communications with both global coverage and unwavering customer service. ITC Global enables improved real-time decision-making and enhanced health, safety and environmental management through a unified communications solution, tailored to the requirements of each client. Solutions include custom network design, hardware implementation, field engineering, technical support and enterprise-grade satellite bandwidth. ITC Global operates 24x7 carrier-class networks across the Americas, Europe, Asia, Africa and Australia. It became a subsidiary of Panasonic Corporation in 2015.
